

# The Future Starts Here

## Get Comfortable in an ENERGY STAR® Certified Apartment Home

Your apartment is your home, and we are proud to offer apartments that have earned the ENERGY STAR label. ENERGY STAR certified apartments are designed and built to provide superior comfort and savings compared to most apartments currently on the market. Offering more than efficient appliances, certified apartments integrate energy efficiency from the ground up.

### The Right Choice, for Today and Tomorrow

ENERGY STAR certified apartments are energy efficient by design, with savings that start now and continue into the future. Better systems and construction features make all the difference throughout your apartment.

- Advanced air sealing, high-quality insulation, and high-performance windows work together to minimize drafts, provide more consistent temperatures, and reduce outdoor allergens from entering your apartment.
- High-performance heating and cooling systems help improve comfort and lower bills.
- Ventilation systems inside your apartment and in common spaces maintain indoor air quality, wherever you are in the building.

### Built on a Foundation of Trust

For 25 years, ENERGY STAR certified apartments have set the standard for quality, efficiency, and lasting value.

- Meet strict requirements set by the U.S. Environmental Protection Agency.
- Tried-and-true best building practices.
- Third-party tested, inspected, and certified.

## A Home You and Your Family Can Be Proud Of

You can feel good about living in an ENERGY STAR certified apartment. You'll enjoy peace of mind knowing it's built to a high standard of construction for enhanced durability—and a future full of treasured memories.

- At least 10 percent more energy efficient than standard apartments built to code—and even more compared to existing apartments.
- Quality construction built from the ground up.
- The smart choice for comfort, air quality, and energy efficiency.

## A Better Environment Starts Inside

Heating and cooling systems are designed and installed to optimize comfort. Ventilation systems improve indoor air quality.

- Forced-air systems have high-performance filters to clean the air you breathe.
- Ventilation systems remove air from your apartment and replace it with fresh outdoor air.
- Efficient HVAC systems work together to provide you with a cleaner, healthier environment—inside and out.

REDUCED LEAKS AND DRAFTS

MORE CONSISTENT TEMPERATURES

BETTER DURABILITY

IMPROVED INDOOR AIR

UTILITY SAVINGS

## A Better Home for a Better Tomorrow

ENERGY STAR certified apartments are just built better. More comfort. Increased savings. A better, healthier world. That's what you can expect from your ENERGY STAR certified apartment. Learn more at [energystar.gov/newapartments](https://energystar.gov/newapartments).
