Re: Comments on U.S. Environmental Protection Agency's ("EPA") Draft 2 for its Energy Star for exterior and interior storm windows Version 1.0 specification

Dear Doug and Brian,

AGC Glass Company North America, Inc. ("AGC") submits the following Comment in support of the U.S. Environmental Protection Agency's ("EPA") Draft 2 for its Energy Star for exterior and interior storm windows Version 1.0 specification ("Draft 2 Specifications").

AGC applauds EPA for its detailed analysis of the comments submitted to the Draft 1 Specifications and, in response, adopting changes in emissivity levels, solar transmittance and interior storms in the Draft 2 Specifications. The changes improve the Draft 2 Specifications and AGC supports them.

AGC looks forward to the finalization of the criteria and publication of the Final Draft in the third quarter of this year.

Very truly yours,

Jon Hughes
Product Manager
