

ENERGY STAR Dataset & API Revision Workflow

About this workflow

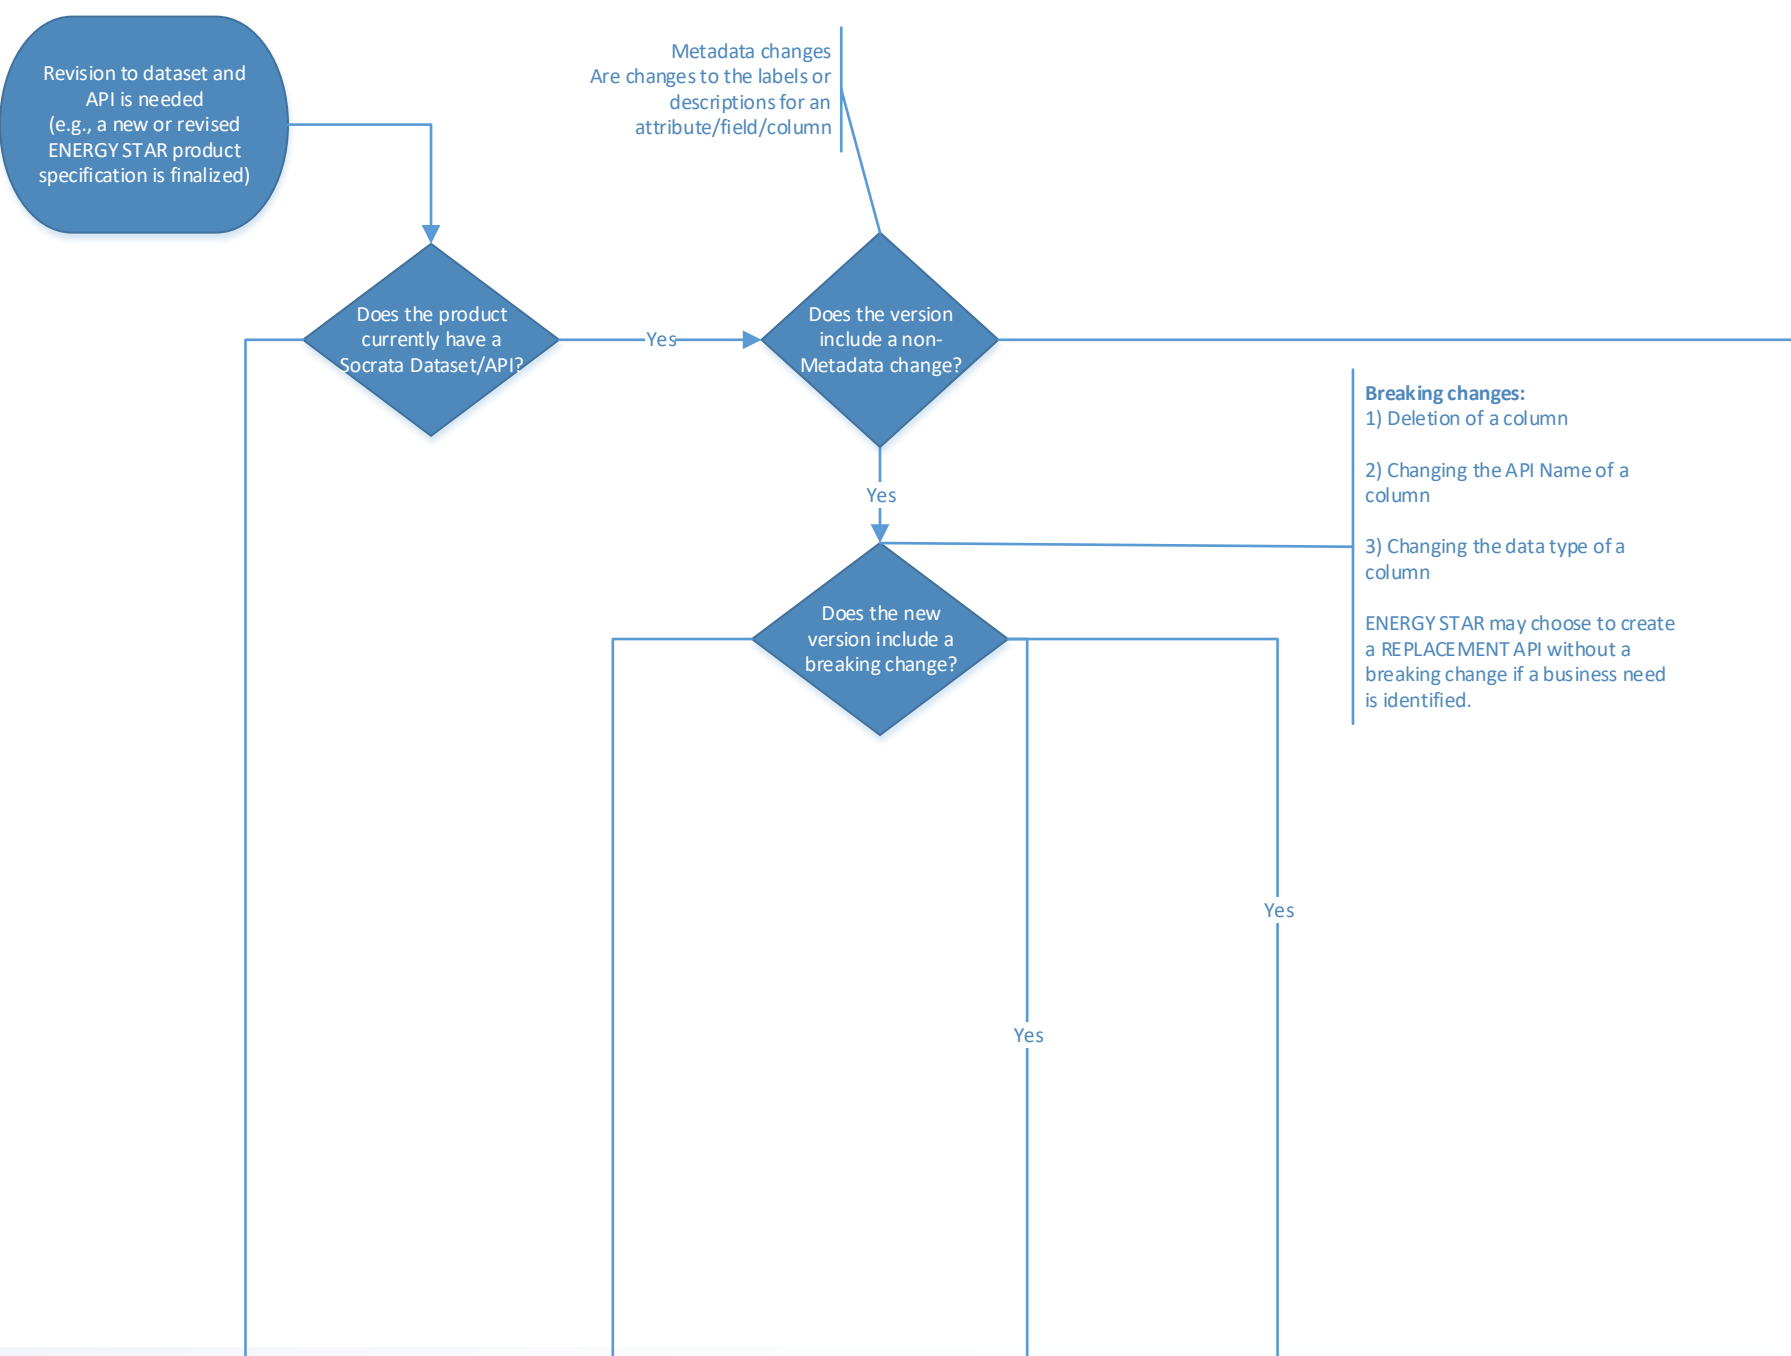

This diagram represents each possible process flow and its related communications. Most often changes are non-breaking. Typical changes require 1-2 announcements on the google groups forum.

Evaluation

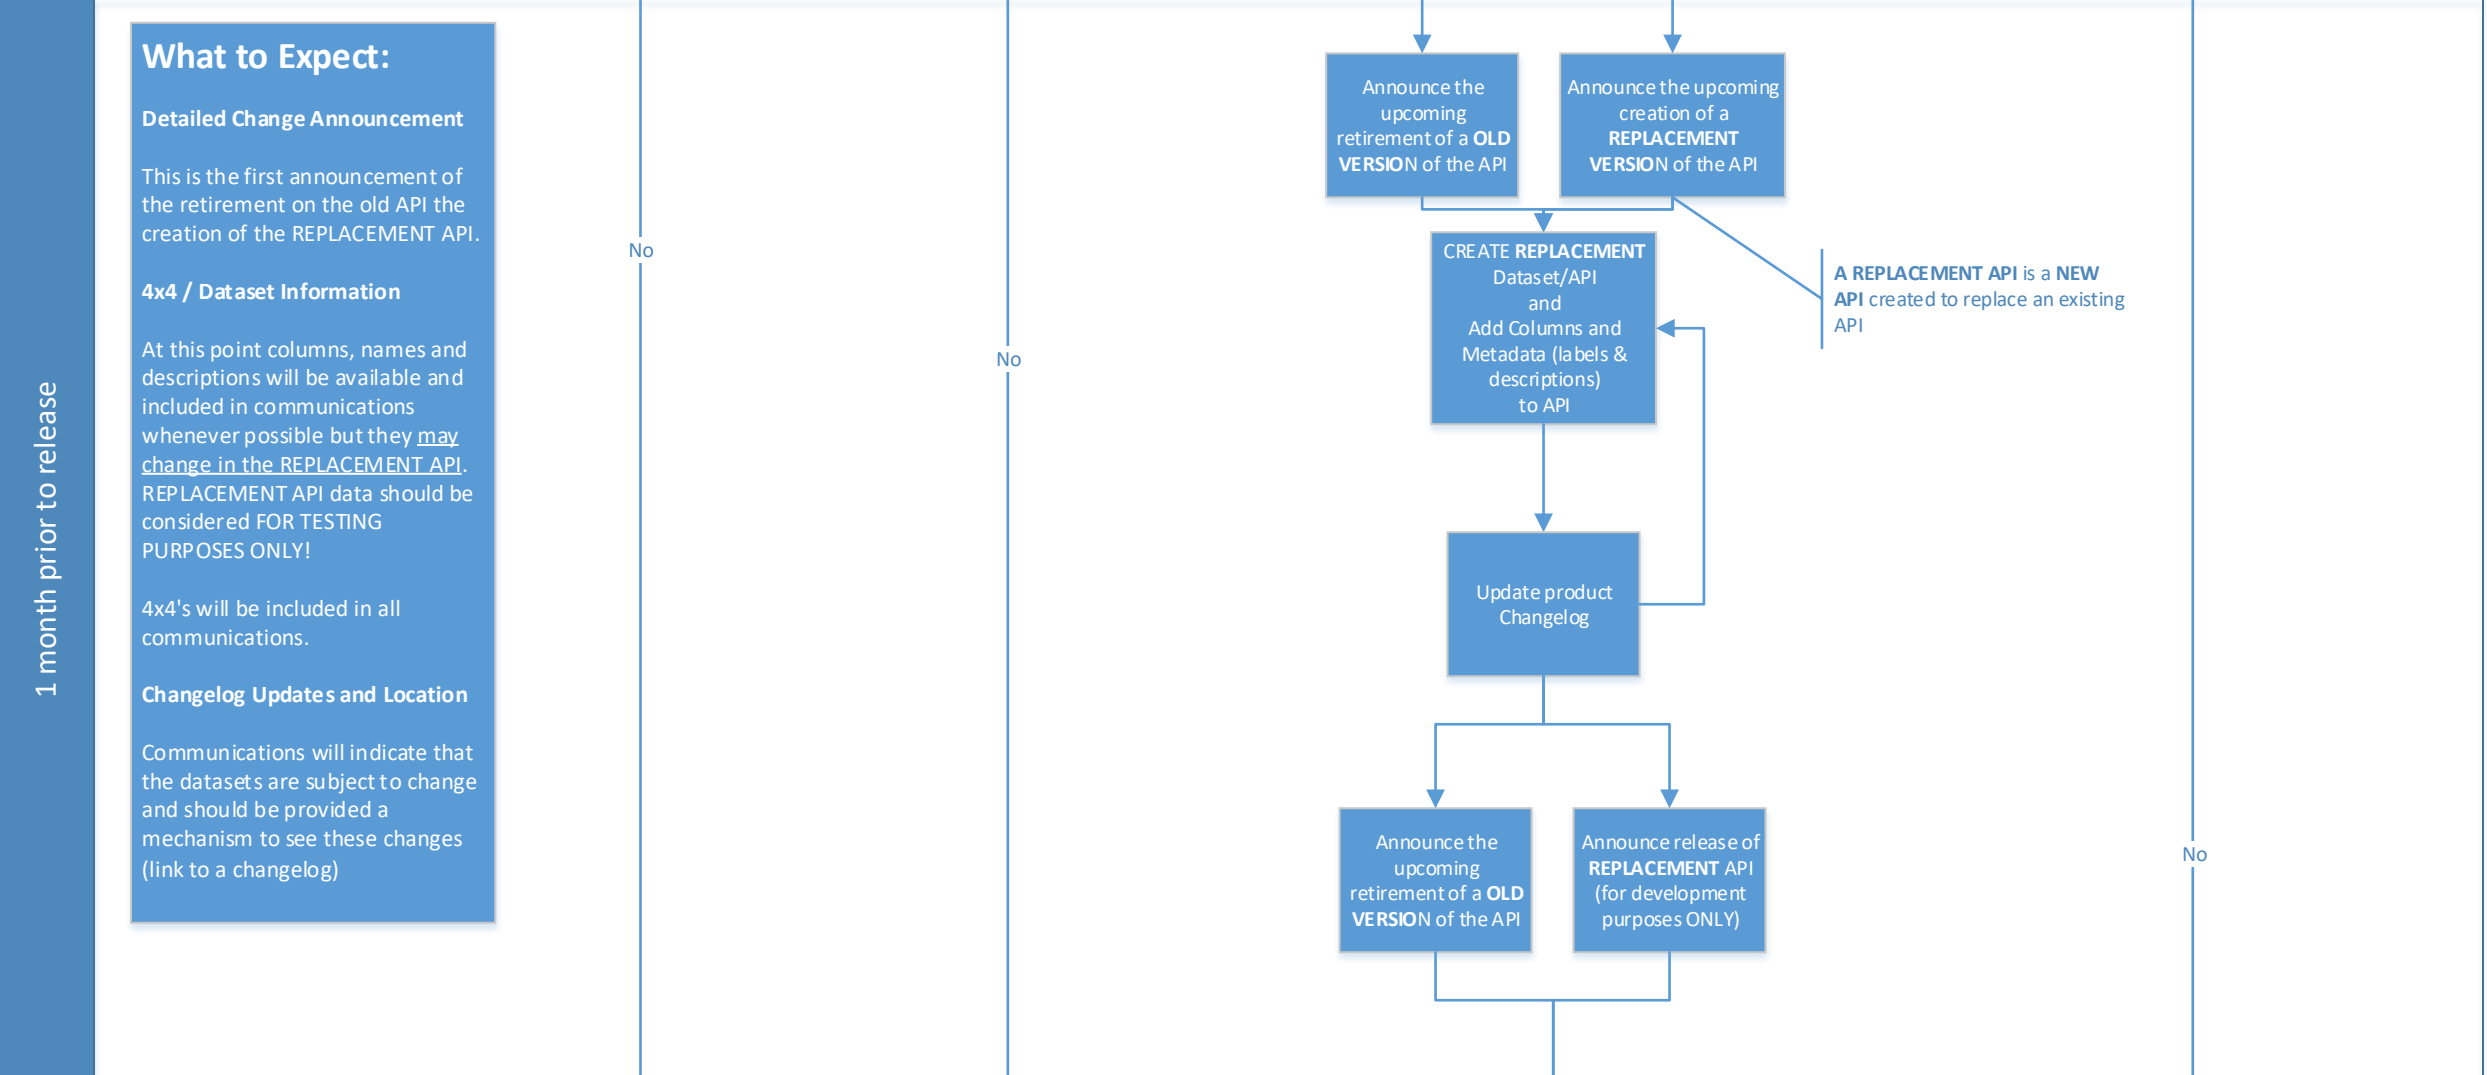

ENERGY STAR Datasets & API's undergo revision in response to periodic review, user feedback and specification changes. The majority of updates to existing datasets are non-breaking data additions or improvements but breaking changes do occur.

Announcements

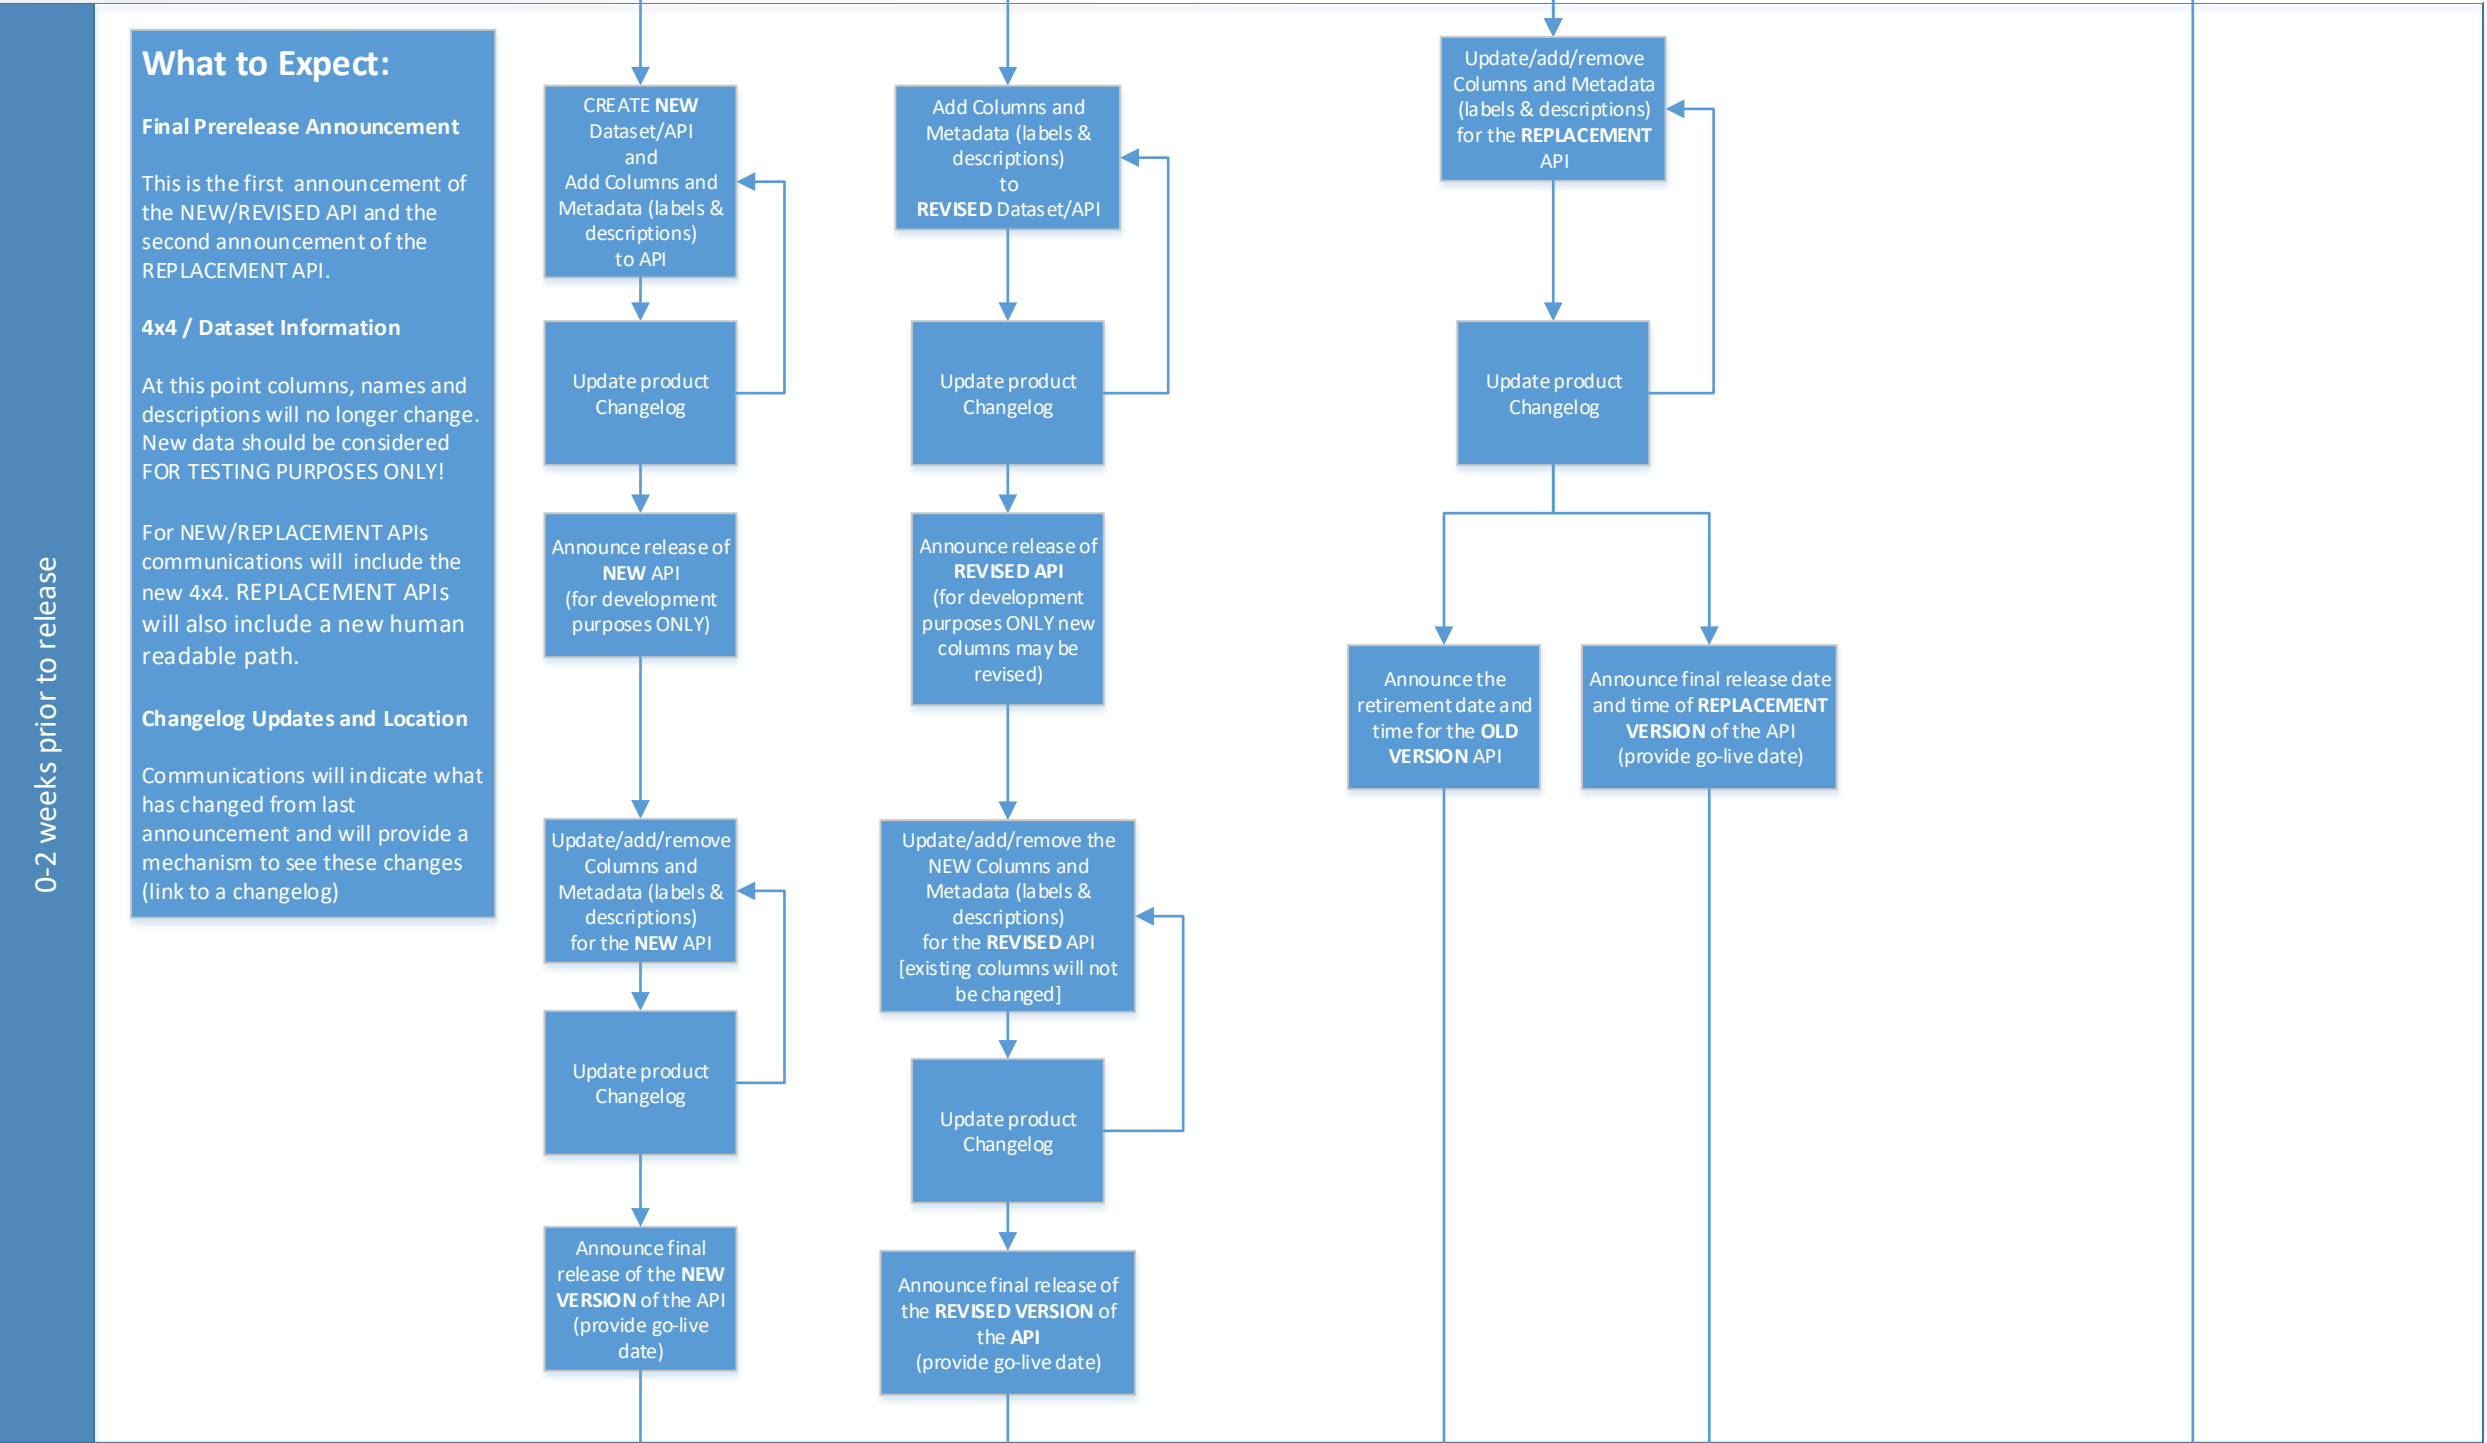

ENERGY STAR announces Dataset and API updates via the ENERGY STAR Products API Developers Group located @ <https://groups.google.com/forum/#!forum/energystarproductsapi>
