Mr. Douglas Anderson
Program Manager
Environmental Protection Agency
windows@energystar.gov

Dear Mr. Anderson,

The Attachments Energy Rating Council (AERC) has reviewed EPA's Response to Comments on the Draft 2 Criteria Analysis Report and the Final Draft version of the ENERGY STAR® Program Requirements for Exterior and Interior Storm Windows.

AERC fully supports the final draft version of the specification and commends EPA for its thorough and rigorous analysis and consideration of all comments as part of the specification development process. AERC believes an ENERGY STAR program for low-emissivity storm windows will help U.S. consumers to save money on their energy bills and live with greater levels of comfort in their homes. An ENERGY STAR label will help increase consumer awareness and adoption of this technology and will help consumers to identify energy efficient technology as it already does for many other product categories.

AERC thanks EPA for creating an ENERGY STAR program for this product category and supports release of the final version of the specification.

Sincerely,

Ralph Vasami
Executive Director, AERC
