Subject: ENERGY STAR Clothes Washer Version 7.0 Demand Response Proposal

Here the requested feedback from BSH:

Wording for 4.G.2d should be changed to “ The product is not required to provide a response if the consumer selected wash cycle is based on below NSF or similar Protocols/Standards“

From Section 4.G.2d:

The product is not required to provide a response if the consumer selected wash cycle is NSF certified to:

- *NSF Protocol P172 “Sanitization Performance of Residential and Commercial, Family-Sized Clothes Washers” or*
- *NSF Protocol P351 “Allergen Reduction Performance of Residential and Commercial, Family-Sized Clothes Washers”*

Note: EPA encourages products to provide Temporary Appliance Load Reduction responses in these cycles when sanitization or allergen reduction operations would not be impacted.

Best Regards
