RE: Therma-Stor LLC comments on Standards for Residential Dehumidifiers  
Final Draft Version 4.0 ENERGY STAR Dehumidifier specification

To whom it may concern,

Therma-Stor manufactures residential dehumidifiers, including the Santa Fe line of free-standing dehumidifiers and the Ultra-Aire line of whole house ventilating dehumidifiers. The following comments are respectfully submitted on behalf of Therma-Stor LLC.

We support the final draft of the version 4.0 specification.

We support the proposed EF levels which remain unchanged from draft 1.

We support the continuation of the current Appendix X test method and the EF metric and the plan to adopt the Appendix X1 test method and IEF metric in the next (v5.0) revision.

We support the proposed timeline and the October 25, 2016 effective date for this revision.

Sincerely,

Tim O'Brien  
Business and Product Development  
Therma-Stor LLC
