

Hi Doug,

My humble apologies for the delayed response. I do want to send along a brief comment on the framework expressing strong support for the framework and the program in general. This technology has the potential to be a huge benefit to utility programs and efficiencies in the thermal envelope for folks without the capitol to invest in window replacements. We are extremely excited about this effort with the framework and the progress. Last year, we invested in an R&D pilot because of our support of this technology. Please find the final white paper [here](#).

If you have any other questions or would like to discuss further, please let me know!

Best,
Lara
