Ann Bailey
Director, Energy Star Product Labeling
U.S. Environmental Protection Agency
1200 Pennsylvania Ave. NW
Washington DC 20460

Sent via email to MostEfficient@energystar.gov

Dear Ms. Bailey:

These comments are respectfully submitted for the record to the Environmental Protection Agency (EPA) on behalf of Electrolux Home Products, Inc "Electrolux" on the Agency's ENERGY STAR Most Efficient criteria for 2022. Electrolux offers clothes washers, refrigerators, dishwashers, dehumidifiers, and room air conditioners recognized as Most Efficient 2021.

Electrolux is one of the world's leading home appliance manufacturers. In the United States and Canada, we are deeply committed to our purpose of shape living for the better. Electrolux has a great opportunity to help create more sustainable and enjoyable living for more people around the country. In 2020, Electrolux was recognized as an Industry Leader in the Household Durables category in the prestigious Dow Jones Sustainability Index (DJSI). Additionally, Electrolux is one of few companies to be recognized for its sustainability leadership with a prestigious double "A" score by the global non-profit CDP for its efforts to tackle climate change and acting to protect water security.

Last year, we broadened and launched our updated For the Better sustainability framework with targets for 2030. Central to this framework is our commitment to provide Better Solutions in the products we produce. Our promise is to continuously improve the energy and water performance of our appliances.

We are proud to support the Energy Star Most Efficient Criteria for 2022, a distinction that recognizes products that deliver cutting edge energy efficiency along with the latest in technological innovation. Our efforts are aligned with the ambition of the ENERGY STAR program to incentivize innovation and continuously improve the energy efficiency profile of appliances. As the Energy Star Most Efficient criteria continues to change, we encourage the EPA to be transparent and to base changes on data that establishes opportunities for the most impactful improvements while preserving a meaningful consumer experience.

Electrolux appreciates the opportunity to comment on EPA's proposed ENERGY STAR® Most Efficient 2022 Criteria. We welcome the opportunity to discuss these matters further.

Respectfully submitted,

Tara Helms
North America Sustainability Director
