

Totally unnecessary to do all of the spec for storm windows. They are what they are. The specs will force the pricing for storm windows closer to that of a vinyl replacement window. Who will buy them if one can buy a good primary window and eliminate the storm window? Cleaning, aesthetics? Will the government provide a tax credit as an incentive?

These specs require a large amount of work for the manufacturer without a real return. You can't use soft coat low-e on storm windows!

Leave well enough alone, I say.

Thank you for the opportunity to service your requirements.

H. Goodman
