To whom it may concern,

I am Johnson Choo at Regulatory and Environmental Affairs in LG Electronics. LG agrees with the addition of new scope and certification criteria in the Final Draft Version 4.0. There is no additional comment on that.

We want to raise a flag regarding the timeline for effective date, October 26, 2015. Usually, EPA allows 2 years of rulemaking period, therefore we expected the same for Version 4.0. However, in this case it will take only a year to be finalized. We understand that DOE regulation has been updated since last June 1st so ENERGY STAR should catch up as soon as possible. Yet it is hard for manufacturers to develop the product to meet the requirements at the limited time.

Please consider LG's comment.

Best Regards,

Johnson Choo
