Doug Anderson  
U.S. Environmental Protection Agency  
1200 Pennsylvania Avenue NW  
Washington, DC 20460

Dear Doug:

Thank you for the opportunity to respond to the Energy Star Program Requirements for Exterior and Interior Storm Windows Final Draft Version 1.0 and accompanying Response to Comments document. Larson Manufacturing Company continues to appreciate the open and transparent process the U.S. Environmental Protection Agency has followed in the development of an Energy Star program for storm windows. Larson further believes this method, which has been guided by input from a wide variety of stakeholders, has led to a fair, reasonable, and scientifically backed final specification.

After reviewing the final draft of the specification and the responses to comments, Larson supports the changes incorporated into the final version of the specification. Larson believes that an Energy Star program for storm windows will serve as a valuable tool for decision-makers wishing to make educated, informed choices and ultimately will help consumers save both energy and money while making their homes more comfortable.

Please do not hesitate to contact me should you have any questions or wish for clarification on anything. Thank you.

Regards,
