Subject: Most efficient

Hello Doug,

Thank you for the opportunity to comment on the 2019 Most efficient criteria. Our concerns are not with the criteria for windows, but for the exclusion of doors.

We find that consumers want a house package for Most Efficient and without the complimentary door product with the ME designation it cannot be provided.

Please add the door product in the one configuration of greater than ½ lite doors with the same performance criteria as windows (.2 U)

Please also feel free to contact us for more detail around the addition of this product, as it is a critical need for customers and consumers.

Thank you

Ray Garries
