Subject: Version 1.0 Energy Star for Interior and Exterior Storm Window Specification

Dear Doug:

On behalf of NSG/Pilkington North America, Inc. I am submitting this comment to the New Energy Star Specification to express our support and appreciation for the initiation of this important Energy Star development. We expect this New Energy Star Specification to extend the energy savings reach of the Energy Star Windows Program well beyond its current boundaries to the many households that cannot otherwise afford whole house window replacements.

Your analysis and final revisions of the New Energy Star Specification are well founded and appropriate.

Keep up the good work!

Best regards,

David Duly
Senior Engineer
NSG Group
