

Dear Ladies and Gentlemen,

We at True Manufacturing Company would like to thank the Energy Star group for all the time and effort invested in finalizing the new Energy Star 4.0 program requirements for Commercial Refrigeration and Freezers. The Energy Star program has been a key factor in the total energy consumption reduction by our industry over the past two decades, with the additional benefit of a program which serves as an excellent sales and marketing tool. The success and recognition of the Energy Star program is such that we could not imagine our industry without this program's existence.

The final Energy Star 4.0 draft fits very well with the Department of Energy 10 CFR Part 431 Energy Conservation Program. Since the DOE final rule goes into effect on March 27, 2017, it makes perfect sense that this new Energy Star 4.0 program go into effect that same day.

We are quite confident that we can achieve the challenging goals established by Energy Star 4.0 and we look forward to many future years of a successful partnership with the Energy Star group. Thank you very much!

Sincerely,

**Ramiro Avila**

Laboratory Manager
