

ASK ABOUT
ENERGY STAR
CERTIFIED APARTMENTS

The future starts here.

Your apartment is your home, and we are proud to offer new apartments that have earned the ENERGY STAR® label. ENERGY STAR certified new apartments are designed and built to provide superior comfort and savings compared to most new apartments currently on the market. Offering more than just efficient appliances, certified apartments integrate energy efficiency from the ground up.

Get comfortable in an ENERGY STAR certified new apartment home.

The right choice, for today and tomorrow.

ENERGY STAR certified new apartments are energy efficient by design, with savings that start now and continue into the future. Better systems and construction features make all the difference throughout your apartment.

- Advanced air sealing, high-quality insulation, and high-performance windows work together to minimize drafts, provide more consistent temperatures, and reduce outdoor allergens from entering your apartment.
- High-performance heating and cooling systems for improved comfort and lower bills.
- Ventilation systems inside your apartment and in common spaces to maintain indoor air quality, wherever you are in the building.

Built on a foundation of trust.

For 25 years, ENERGY STAR certified new apartments have set the standard for quality, efficiency, and lasting value.

- Meets strict requirements set by the U.S. Environmental Protection Agency.
- Tried-and-true best building practices.
- Third-party tested, inspected, and certified.

A home you and your family can be proud of.

You can feel good about living in an ENERGY STAR certified apartment. You'll enjoy peace of mind knowing it's built to a high standard of construction for enhanced durability—and a future full of treasured memories.

- At least 10% more energy efficient than standard new apartments built to code—and even more compared to existing apartments.
- Quality construction built from the ground up.
- The smart choice for comfort, air-quality, and energy efficiency.

A better environment starts inside.

Heating and cooling systems are designed and installed to optimize comfort. Ventilation systems improve indoor air quality.

- Forced-air systems have high performance filters to clean the air you breathe.
- Ventilation systems remove air from your apartment and replace with fresh outdoor air.
- Efficient HVAC systems work together to provide you with a cleaner, healthier environment—inside and out.
