Subject: RE: ENERGY STAR Version 7.0 Residential Dishwashers Final Draft Specification

Hello Ga-Young,

CEE has reviewed the Final Draft ENERGY STAR Version 7.0 Residential Dishwashers specification. Given that the specification maintains the criteria proposed in Draft 2, we do not have any additional comments at this time and defer to the previous CEE comment letter submitted. Please let me know if it would be helpful to the ENERGY STAR process to have formal comments submitted by CEE in response to the Final Draft.

We are especially excited to see EPA moving forward with removal of the 5% connected allowance for demand response capable dishwashers given compromises on product efficiency and consumer energy savings. CEE continues to strive for an Integrated Home vision where all household energy consuming systems and devices communicate seamlessly to deliver connected functionality, and we acknowledge that prioritizing energy efficiency in pursuit of this goal is paramount. We look forward to continuing to work closely with EPA and the ENERGY STAR Program in the coming years to distinguish energy efficient and connected products for promotion through the CEE membership.

Sincerely,

Chloe Mayhew (she/her), Program Associate

Subject: ENERGY STAR Version 7.0 Residential Dishwashers Final Draft Specification

[EXTERNAL SENDER]

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF AIR AND RADIATION

June 2, 2022

Dear ENERGY STAR® Residential Dishwasher Partners or Other Interested Stakeholders,

With this letter, the U.S. Environmental Protection Agency (EPA) is pleased to share the Final Draft [ENERGY STAR Version 7.0 Residential Dishwashers specification](#). EPA would like to thank the many stakeholders who have invested time and effort to contribute feedback that has informed this product specification process. The effective date for this ENERGY STAR Dishwashers specification will be July 6, 2023.

EPA appreciates stakeholders' feedback on the Draft 2 specification. Responses to stakeholder comments are reflected in the final draft specification as well as in the accompanying [Draft 2 Comment Response Matrix](#).

The Final Draft ENERGY STAR Version 7.0 Residential Dishwashers specification maintains the criteria proposed in Draft 2, including the proposed minimum energy and water efficiency requirements as well as a cleaning index threshold of 65. Given that the current ENERGY STAR market share for dishwashers is near 100%, instituting these changes is important to preserving the consumer value associated with the label. In recognition of simultaneous testing requirements associated with forthcoming changes to 10 CFR 430, Subpart B, Appendix C1 and ENERGY STAR, EPA has extended the transition period for Version 7.0 revision to 12 months.

Any final comments on the Version 7.0 Final Draft specification may be submitted **no later than June 30, 2022** to appliances@energystar.gov. All comments received will be posted to the [ENERGY STAR Residential Dishwashers Version 7.0 Specification Development webpage](#), unless the submitter specifically requests that their comments remain confidential.

Please contact Ga-Young Park, EPA, at Park.Ga-Young@epa.gov or (202) 564-1085, or Steve Leybourn, ICF, at Steve.Leybourn@icf.com or (202) 862-1566, with any questions or concerns about the specification. Thank you for your continued support of the ENERGY STAR program.

Best Regards,

Ga-Young Park
