OFFICE OF AIR AND RADIATION

Dear ENERGY STAR® Smart Home Energy Management Systems (SHEMS) Stakeholders,

The U.S. Environmental Protection Agency (EPA) is pleased to announce that planning is underway for the 2020 ENERGY STAR Products Partner Meeting, which will feature two sessions with dedicated SHEMS content. This year's meeting will take place Tuesday, October 27 – Thursday, October 29, 2020, in Denver, Colorado. In the event that social distancing persists, we are designing the meeting so we can convene virtually over the same dates. Please hold October 27 – 29 for ENERGY STAR, and we will keep you posted on our plans as the dates get closer.

We are seeking proposals from stakeholders who want to present their ENERGY STAR SHEMS-related ideas and expertise at Partner Meeting! We are looking for:

- Insights from SHEMS-related pilots. Pilots of interest should be leveraging systems that align with the ENERGY STAR criteria even if not yet certified, and may be planned, in progress, or completed.
- Pitches regarding ENERGY STAR SHEMS-related projects or products. Find support for your ideas for groundbreaking smart home device integrations, service offerings, or pilot programs!

Interested in presenting? Contact smarthomesystems@energystar.gov with a brief description of your role and presentation topic by July 8.
