ENERGY STAR®, a U.S. Environmental Protection Agency program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit [www.energystar.gov](http://www.energystar.gov).

Dear ENERGY STAR® Pool Pumps Stakeholders:

The U.S. Environmental Protection Agency (EPA) would like to remind stakeholders that as of March 5, 2021, EPA-recognized certification bodies (CBs) are required to cease certification of new Pool Pumps to the Version 2.0 specification and may only certify Pool Pumps to the Version 3.0 specification. Certification bodies may continue submitting administrative modifications to existing Pool Pump certifications to the Version 2.0 specification until July 19, 2021. After this date, only Pool Pumps certified to the Version 3.0 specification will appear on the ENERGY STAR website and certified products list.

CBs must notify EPA by March 4, 2021 of models certified to Version 2.0, but not yet submitted to EPA, along with information on when data will be submitted. Failure to do so will result in QPX blocking submissions of these products to EPA.

Please contact EPA at [Poolpumps@energystar.gov](mailto:Poolpumps@energystar.gov) with any questions regarding the specification. CBs should direct questions concerning the submittal of certified Pool Pumps to [Certification@energystar.gov](mailto:Certification@energystar.gov).
