ENERGY STAR®, a U.S. Environmental Protection Agency program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit www.energystar.gov.

Dear ENERGY STAR® Partners and Stakeholders:

Yesterday, Environmental Protection Agency Administrator Michael Regan joined other members of the Biden cabinet to announce new initiatives supporting a whole of government approach to efficient decarbonization of U.S. buildings. In outlining EPA's commitment, Administrator Regan emphasized the importance of partnership programs, highlighting recent updates to the ENERGY STAR specifications for CAC/ASHPs and water heaters, as well as the expansion of the ENERGY STAR EVSE specification to cover DC fast chargers.

We look forward to continuing our important work, together, to advance an economy-wide transition to the efficient technologies that are critical in the fight against climate change.
