WATER HEATERS

CELEBRATING
20 YEARS OF
ENERGY STAR

AGENDA

Celebrating ENERGY STAR's 20th Anniversary

A Message from the Administrator

Twenty years ago, the U.S. Environmental Protection Agency (EPA) created a unique partnership to overcome market barriers to energy efficiency and create a healthier climate for all Americans. Today, we celebrate two decades of partnership, promise, and progress with the ENERGY STAR program.

Together with the Department of Energy, we have seen the ENERGY STAR program grow to include nearly 20,000 organizations from every sector of the economy. More than 80 percent of Americans now recognize the ENERGY STAR label. American families and businesses have saved a total of nearly \$230 billion on utility bills and prevented more than 1.7 billion metric tons of greenhouse gas emissions with help from ENERGY STAR.

As we celebrate our past, we also look to the future. We remain committed to helping America embrace energy efficiency as one of the fastest and easiest ways to save money, prevent pollution, and create jobs. We look forward to continued partnership and enduring progress toward a healthy environment and a prosperous economy for our families and our future.

Lisa P. Jackson
Administrator
United States Environmental Protection Agency
