

A design and development leader working at the forefront of LED technology, Ethan Biery focuses on maintaining and strengthening strategic alliances with leading lighting companies. He also helps guide the development of LED-related standards, such as the National Electrical Manufacturers Association's (NEMA) SSL 7A. He works closely with Lutron's LED Center of Excellence to improve compatibility between LED loads and Lutron controls. In addition, he participates in customer trainings and industry presentations, and has authored numerous technical whitepapers and trade journal articles. Ethan's technical work has been recognized with six patents. He was also selected to represent the United States as a 2013 International Electrotechnical Commission (IEC) Young Professional, and was a subsequent recipient of the American National Standards Institute (ANSI) Next Generation Award. He also is a member of the Technical Management Committee for the U.S. National Committee to the IEC, where he contributes to the development of international electrotechnical standards.
