

# A Heating and Cooling System That Works For You

[www.energystar.gov/hpwes](http://www.energystar.gov/hpwes)

## Do you have a system that:

- 10+** Is more than 10 years old?
-  Requires frequent repairs?
-  Constantly turns off and on?
-  Results in high energy bills?

**Problems like these could mean your home isn't working as it should.**

“ Our upstairs is finally warm in the winter. We don't need space heaters anymore. To see the return on your money so fast is insane. ”

– Ana, Homeowner, Ellicott City, MD

## Get more from your home with Home Performance with ENERGY STAR.

A qualified local expert will conduct a Home Performance Assessment including specifically looking at your home's heating and cooling system to:

- Evaluate safety, performance, and energy efficiency
- Determine the right time for a repair or replacement

When it is time for an improvement, your qualified local expert will:

- Recommend an ENERGY STAR system
- Properly install or repair your system
- Recommend any duct sealing, insulation, air sealing, and other features that could improve your home's performance
- Help you to efficiently operate your system
- Be backed by third-party quality assurance

## Home Performance Assessment Checklist

- ✓ Homeowner Interview
- ✓ Energy Bills Review
- ✓ Home Evaluation
- ✓ Safety Check & Testing
- ✓ Home Improvement Recommendations

ENERGY STAR® is the simple choice for energy efficiency. For more than 20 years, people across America have looked to the ENERGY STAR program for guidance on saving energy, saving money, and protecting the environment. Home Performance with ENERGY STAR is a systematic approach to improving energy efficiency and comfort in homes, while reducing the greenhouse gas emissions that contribute to climate change.
