

ENERGY STAR[®] CERTIFIED

NEW CONSTRUCTION

Date:

ENERGY STAR Certification Confirmation

Your home was previously given a conditional ENERGY STAR certification while your builder finished the remaining construction work in the building and had the final required independent verifications performed to ensure that all units and common spaces in the building have met EPA's rigorous requirements for energy efficiency.

Your builder has now completed this work, and the ENERGY STAR certification for the building and your unit have been finalized and confirmed.

Should you have any questions, please contact your builder at:
