**Comments on “ENERGY STAR Program Requirements Product Specifications  
for Computers Draft Version 5.2”**

JEITA Energy Saving Committee  
(PC group)

We understand The Refinements to Product Specifications are aiming to make it easier for third parties to conduct measurement and certification. Therefore no change should be made to the original text of the Eligibility Criteria in the current Specification. Only the parts that are unspecific to the third parties that conduct certification and tests are to be additionally described as descriptions and supplements.

We believe that further discussions are required before the criteria can be changed.
