

Jean Paul Freyssinier is a Senior Research Scientist and Adjunct Professor of Architecture at Rensselaer Polytechnic Institute's Lighting Research Center. He received a BS in Electrical and Mechanical Engineering from the National Autonomous University of Mexico and a MS in Lighting from RPI. His research interests include solid-state lighting, LED performance, technology transfer, energy-efficient lighting design, photometry, the spectral effects of lighting, and education. For over 15 years, he has been involved in lighting technology research and development at the LRC. His lighting experience includes working as principal of design in a full-service architectural lighting and automation design firm in Mexico.
