

Lifetime Savings

ENERGY STAR® certified bulbs use up to 90% less energy than incandescent bulbs, last at least 15 times longer, and save you more than \$66 in energy bills and bulb replacement costs over their lifetime.

Savings figures based on 15,000 hour LED lifetime; 1,000 hour incandescent lifetime; an average lifetime electric rate of 13¢ per kWh; an LED price of \$4; and an incandescent price of \$2.

"Total cost" is calculated by adding the total purchase cost and the total lifetime energy costs.
