Looking for the ENERGY STAR®

ENERGY STAR certified bulbs use less energy, so they last longer to operate than standard bulbs. And less energy means fewer greenhouse gas emissions.

- Use up to 75% less energy than standard bulbs.
- Save more than $5 in electricity costs over its lifetime.
- Provide the same brightness (lumen) with less energy (watts).
- Last 15 times longer than standard bulbs.
- Help protect the environment and prevent climate change.

Choosing the Right Brightness & Color

MORE LUMENS
MORE LIGHT

- More means the amount of electricity a bulb needs to operate.
- ENERGY STAR certified bulbs provide the same brightness (lumens) with less energy (watts).

ENERGY STAR bulbs are available in a wide range of colors. Light color, or appearance, matches a temperature on the Kelvin scale. Lower K means warmer, yellowish light, while higher K means cooler, blue light.
