

An Overview of Portfolio Manager for Commercial Building Benchmarking

Benchmarking allows you to:

- Evaluate portfolio-wide performance
- Understand individual building performance
- Compare energy performance to national median
- Identify and address potential problems by looking at monthly trends
- Track the impact of energy, water, waste management strategies

ANY building can be benchmarked.

Compare your building to a **national sample** of similar buildings

Compare your buildings of a similar type to **each other**

Identify underperformers in your portfolio and set priorities for the use of limited staff time and/or investment capital

Comparing 12 City-Owned Fire Stations

Why Focus on Buildings and Plants?

Buildings and plants use a lot of energy, but they don't have to.

The average building wastes **30 percent** of the energy it consumes because of inefficiencies.

Why Focus on Buildings and Plants?

Energy use reductions of **10%** or more are possible with little or no cost.

Why Focus on Buildings and Plants?

Energy use reductions of 10–60% are possible in a single year.

- Launched Portfolio Manager in 1999 to help organizations increase efficiency of energy use
- Built on the principle that the foundation of good management is good information
 - Energy tracking and management was not widely practiced; no standardization
 - Designed for the use of building owners and managers, not for reporting to EPA
- Added water tracking in 2006, in collaboration with EPA's WaterSense
- Added waste tracking in 2016, in collaboration with EPA's Office of Resource Conservation & Recovery

Management Tool

Assess whole building energy and water consumption, plus waste

Track green power purchase

Share/report data with others

Track changes in energy, water, greenhouse gas emissions, and cost over time

Create custom reports

Apply for ENERGY STAR certification

Hundreds of metrics, including:

Energy use
Source, site,
weather
normalized,
demand

Water use
Water use intensity,
Water Score
(for Multifamily)

Waste & Materials
Waste intensity,
diversion rate

**1-100
ENERGY STAR
score**

**GHG
emissions**
Indirect,
direct, total,
avoided

Who Is Using Portfolio Manager?

- Building owners, managers, tenants, service providers
- Local, county, and state governments, some with benchmarking and public disclosure policies
- Federal agencies under executive orders & statutes
- Green building certification programs
 - LEED, Green Globes, BREEAM
- Consumer information sites
 - TripAdvisor, CoStar, Apartments.com
- Energy competitions
 - Kilowatt Crackdowns
- Investors, via sustainability reporting and ranking
 - GRESB, Greenprint, CDP
- Multifamily financing industry
 - Fannie Mae, Freddie Mac, HUD

State and Local Policies

U.S. City, County, and State Policies for Existing Buildings: Benchmarking, Transparency, and Beyond

© Copyright 2022 Institute for Market Transformation. Updated 04/2022

- Benchmarking required for public and commercial buildings
- Benchmarking and additional actions required for public and commercial buildings

- Benchmarking required for public, commercial, and multifamily buildings
- Benchmarking and additional actions required for public, commercial, and multifamily buildings

Benchmarking laws that require use of ENERGY STAR Portfolio Manager

More than 3 dozen laws nationwide

Buildings must:

1. Benchmark their energy use
2. Report it on an annual basis
3. Disclose to public or potential buyers/lessees

EPA only advises on the use of Portfolio Manager

Building Performance Policy Overview

- 50 jurisdictions with benchmarking & disclosure/transparency laws
 - 26 of which include beyond-benchmarking requirements
 - 15 with mandatory building audits/assessments and/or retuning/retrocommissioning
 - 11 with building performance standards
- Policies enacted in 2020, 2021, or 2022 (as of 5/4/22) are listed in the table at right

Benchmarking	BPS	Retuning
Ann Arbor, MI	Aspen, CO	Miami, FL
Aspen, CO	Boston, MA	Philadelphia, PA
Bloomington, MN	Colorado	
Colorado	Chula Vista, CA	
Columbus, OH	Denver, CO	
Indianapolis, IN	Maryland	
Maryland	Montgomery County, MD	
Miami, FL	St. Louis, MO	
St. Paul, MN		

Using Portfolio Manager

A Metrics Calculator that generates key performance indicators.

- ✓ Energy consumption (source, site, weather normalized, EUI)
- ✓ Water consumption (municipally supplied potable and reclaimed, alternative)
- ✓ Waste management (disposed, recycled, donated/reused, and composted)
- ✓ Greenhouse gas emissions (indirect, direct, total, avoided)
- ✓ ENERGY STAR 1-to-100 score (available for many building types)

A Management Tool that provides a platform for a strategic energy management

- ✓ Identify high performing facilities for recognition and replicable practices.
- ✓ Prioritize poor performing facilities for immediate improvement.
- ✓ Understand the contribution of energy expenditures to operating costs.
- ✓ Develop a historical perspective and context for future actions and decisions.
- ✓ Establish reference points for measuring and rewarding good performance.
- ✓ Apply for ENERGY STAR certification

Translate simple information into dozens of performance indicators

Energy Metrics (Site and Source)

- Total Energy Use (kBtu)
- Energy Use Intensity (EUI) (kBtu/Sq. Ft.)
- Weather Normalized EUI (kBtu/Sq. Ft.)
- National Median EUI (kBtu/Sq. Ft.)
- % Difference from National Median EUI (%)

Comparisons

- Total Energy Use (kBtu)
- Energy Use Intensity (kBtu/Sq. Ft.)
- Adjusted Energy Use (%)
- GHG Emissions (MtCO₂e)
- Available against baseline or between any two periods.

Financial

- Annual Energy Cost
- Total Energy Cost per Sq. Ft.
- Cumulative Investment in Facility Upgrades
- Cumulative Investment per Sq. Ft.

Renewable Energy

- Total On-Site Electric Generation (kWh)
- Percent of Electricity from On-Site Renewable (%)
- Total Renewable Energy Certificates Purchased and Sold
- Total Avoided Greenhouse Gas Emissions from RECs (MtCO₂e)

Set goals and track progress

Monitor progress and document savings goals achieved

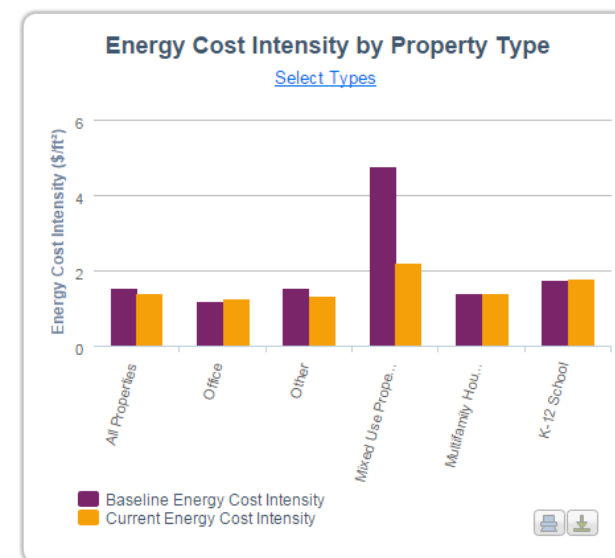

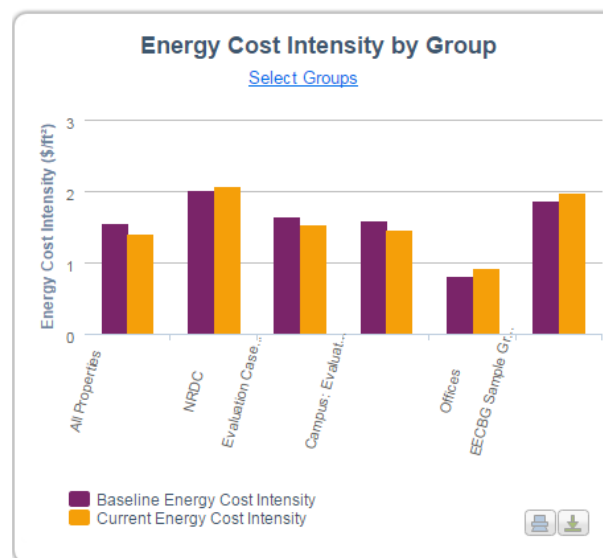

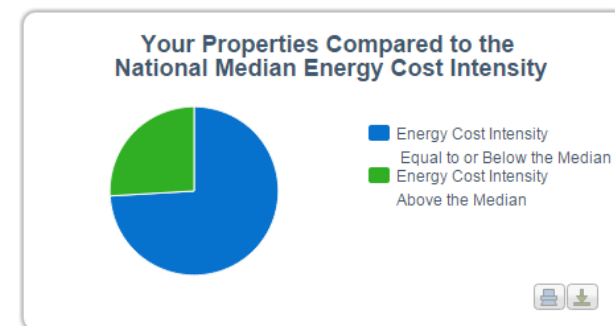

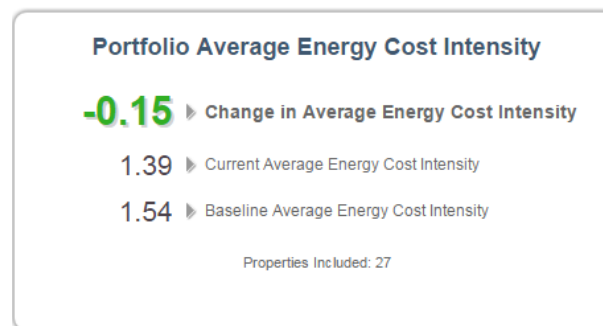

Track targets at the building or portfolio levels

Set performance targets and baselines

Beyond Benchmarking

- Access off-the-shelf portfolio-specific reports
 - Site and source EUI, water use intensity, emissions intensity, etc.
- Generate custom reports
- Create report templates for consistent reporting
- Create data requests to collect building data from other Portfolio Manager users
- Exportable charts & graphs

Manage your portfolio

- Create customized groups of buildings to manage your portfolio
- Share full or limited building information with other Portfolio Manager users
- Allow shared users access to edit or share building data
- Transfer buildings to other accounts
- Make copies of buildings

ENERGY STAR certification for commercial buildings

- Building must be in the United States or territories
- Achieve an ENERGY STAR score of 75 or higher
- Apply for ENERGY STAR recognition via Portfolio Manager
- Application must be verified by a licensed professional
- Awarded based on the calendar year of application
- Must re-apply annually to keep current

ENERGY STAR in Canada

- EPA's ENERGY STAR program partnered with Natural Resources Canada (NRCan) to adapt the tool for use with Canadian properties
 - Visit <https://www.nrcan.gc.ca/energy-efficiency/energy-star-canada/18953>
- Portfolio Manager is available in French
- Property Types eligible to receive a - 100 ENERGY STAR Score
 - Commercial office
 - K-12 school
 - Hospital
 - Ice/Curling Rinks
 - Medical office
 - Senior Living Communities and Residential Care Facilities
 - Supermarket/grocery store
- Building certification has been available since March 2018

Get Started: Gather the information needed to benchmark

- Property information
 - Building type
 - Name, street address, ZIP/postal code
- Property type data
 - Gross floor area
 - Use details (e.g., workers, operating hours)
- Utility bills
 - From all purchased and on-site generated energy (*required for EUI and/or 1 to 100 ENERGY STAR Score only*)
 - From all purchased and on-site generated water
 - Related to waste management

Four Ways to Get Data into Portfolio Manager

- **Manual Data Entry**
 - Type in each number for each monthly entry
- **Single Meter Spreadsheet**
 - Use a spreadsheet to update one meter a time
 - Copy/paste data from Excel to Portfolio Manager
- **Multi-meter Spreadsheets**
 - Use a spreadsheet to update multiple meters from multiple properties
- **Web Services**
 - Companies electronically enter utility data into Portfolio Manager through a process of data exchange called “web services”
 - Find utilities that provide aggregated benchmarking data at www.energystar.gov/utilitydata

Other Resources

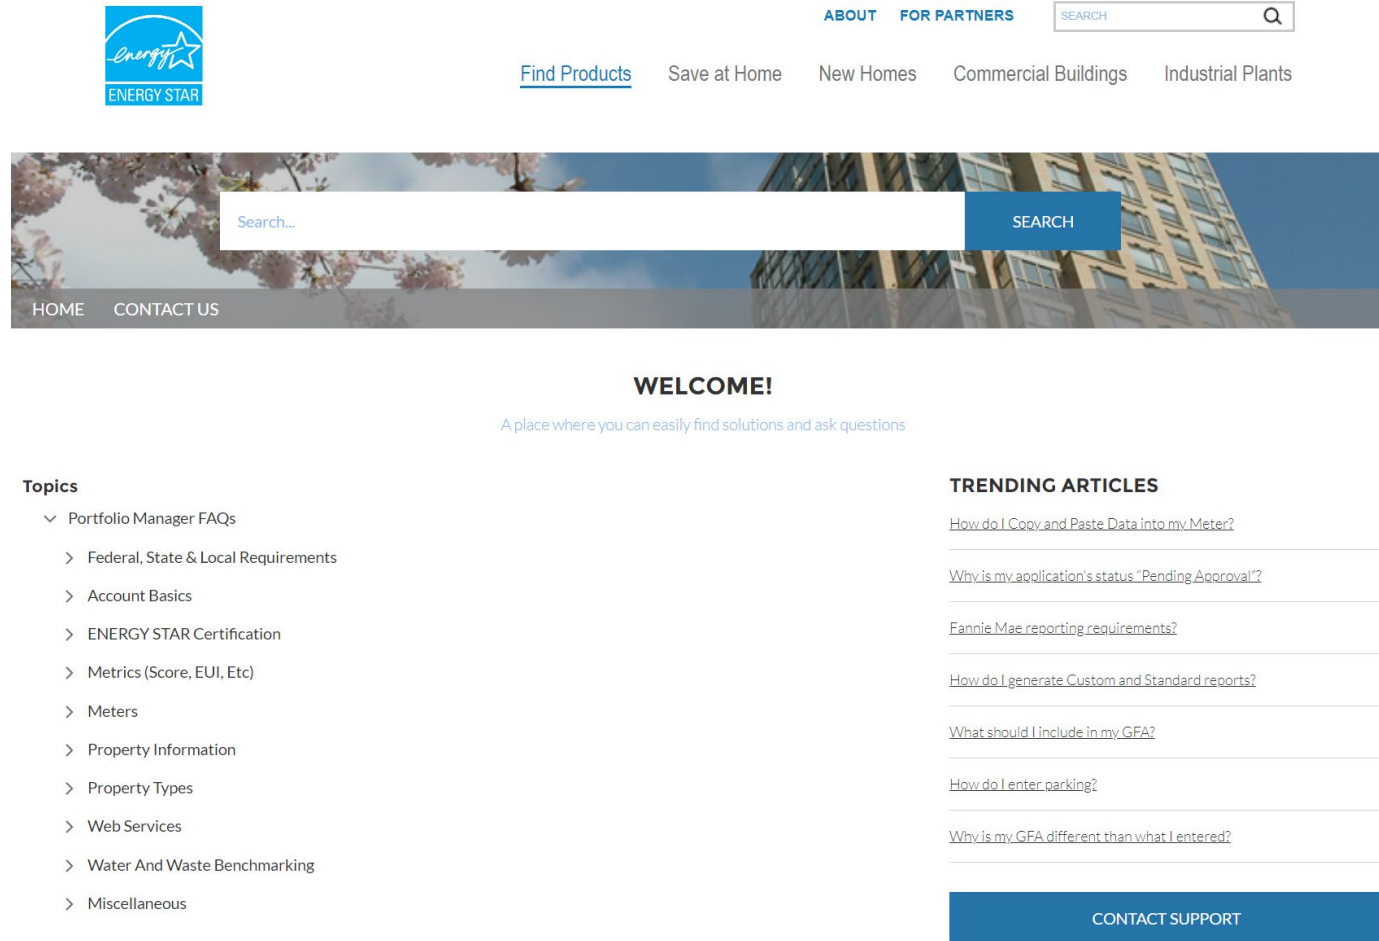

Learn more about Portfolio Manager

- Visit energystar.gov/buildings/training
 - Step-by-Step guides for using Portfolio Manager
 - Access to live and recorded webinars
 - Webinar slides for Portfolio Manager 101, 201, and 301
 - Short videos to help you create a property, create meters, populate meters, create reports, and more!

ENERGY STAR Help Desk

The screenshot shows the ENERGY STAR Help Desk website. At the top left is the ENERGY STAR logo. To its right are links for 'ABOUT' and 'FOR PARTNERS', followed by a search bar. Below these are navigation links: 'Find Products' (underlined), 'Save at Home', 'New Homes', 'Commercial Buildings', and 'Industrial Plants'. A large banner image of a modern building with a search bar and 'SEARCH' button is positioned below the navigation. Under the banner are links for 'HOME' and 'CONTACT US'. The main content area starts with a 'WELCOME!' heading, followed by the tagline 'A place where you can easily find solutions and ask questions'. On the left, a 'Topics' section lists various categories with expandable arrows. On the right, a 'TRENDING ARTICLES' section lists several FAQ-style questions with underlined links. At the bottom right is a blue 'CONTACT SUPPORT' button.

Topics

- Portfolio Manager FAQs
 - Federal, State & Local Requirements
 - Account Basics
 - ENERGY STAR Certification
 - Metrics (Score, EUI, Etc)
 - Meters
 - Property Information
 - Property Types
 - Web Services
 - Water And Waste Benchmarking
 - Miscellaneous

ENERGY STAR® PortfolioManager® Building Emissions Calculator

The screenshot shows the 'Building Emissions Calculator' interface. At the top left is the Energy Star Portfolio Manager logo, and at the top right is a 'Help' link. The main heading is 'Building Emissions Calculator'. Below it, a paragraph explains that the tool expands on Portfolio Manager's GHG estimation functionality. Another paragraph describes how to import data from Portfolio Manager or enter it manually. A warning states that data is not saved and should be downloaded. A 'Click below to get started!' prompt leads to three options: 'Import Data from Portfolio Manager Account' (simplest), 'Upload Report from Portfolio Manager' (best for groups), and 'Enter the Data Manually' (for those without data).

Building Emissions Calculator

This tool expands on Portfolio Manager's greenhouse gas (GHG) estimations functionality. Use it to estimate historical, current and future annual greenhouse gas emissions resulting from your building's energy use.

Import your data directly from Portfolio Manager—or enter it manually—to see estimated GHG emissions from energy use at your building and portfolio, customize emissions factors, and forecast emissions scenarios.

Use the download function to export your data and results, as the Building Emissions Calculator does not save any information.

Click below to get started!

- IMPORT DATA FROM PORTFOLIO MANAGER ACCOUNT**
Simplest option for retrieving your data
- UPLOAD REPORT FROM PORTFOLIO MANAGER**
Best option if you use groups or other filters in Portfolio Manager
- ENTER THE DATA MANUALLY**
Use this option if you don't have building data in Portfolio Manager

Past, Current, and Future GHG Calculations

- Estimate your building's GHG emissions,
- Support GHG emissions inventories,
- Evaluate emissions under local building performance standards
- Forecast the impact of changes in building efficiency and energy procurement.
