ENERGY STAR®, a U.S. Environmental Protection Agency program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit www.energystar.gov.

Dear ENERGY STAR® Commercial Food Service Partners and Stakeholders:

The U.S. Environmental Protection Agency (EPA) invites you to participate in its next installment of the commercial food service (CFS) webinar series happening today!

This webinar series occurs monthly and covers a range of topics which highlight strategies to leverage the ENERGY STAR logo, tools, and resources, ENERGY STAR partner success stories, and more! The May webinar will spotlight ENERGY STAR partner McDonald's and the fast-food chain's energy savings journey.

Webinar information:

Title: Designing McDonald's Net-Zero Energy Restaurant and Other Energy Goals

Date and Time: Tuesday May 18; 1 PM – 2 PM EST

Please register for the webinar [here](#).

McDonald's has been an ENERGY STAR partner since 2001 and has been dedicated to advancing energy efficiency across its restaurant chain since. Last year through its Our Planet Climate Action initiative, McDonald's completed construction of the first ever net-zero energy designed restaurant. The building leverages energy savings through efficient equipment and generates enough energy to offset the amount used with solar panels. Join us for our May CFS webinar to hear McDonald's representatives discuss their energy savings goals, strategies, plans, and for a deeper dive into the construction of their net-zero restaurant.

Questions may be directed to CFS@energystar.gov.

Thank you for your support of ENERGY STAR.
