OFFICE OF AIR AND  
RADIATION

Dear ENERGY STAR® Partner:

The U.S. Environmental Protection Agency (EPA) is **rescheduling** the Heat Pump Water Heater webinar for next week. Please join us!

**The Time is Now! Efficiently Decarbonizing the Residential Space with ENERGY STAR Certified Heat Pump Water Heaters**

**Date and Time:** December 6th from 3:00 – 4:00 PM ET

**Please register for the webinar [here](#).**

Heat Pump Water Heaters (HPWHs) are a powerful but largely overlooked decarbonization opportunity—2023 marks the beginning of a new era. Learn how utilities and municipalities can take advantage of what some refer to as the “LED of water heating.” ENERGY STAR’s team will provide an overview of its newest marketing messages and support of HPWH growth, and how the adoption of HPWH fits into other ENERGY STAR programs like ENERGY STAR Home Upgrade and ENERGY STAR Residential New Construction. The team will also outline the Inflation Reduction Act’s game-changing impacts on the expansion of the technology. Come join the transition to a clean energy future with Heat Pump Water Heaters!

We look forward to your participation! Questions may be directed to your account manager or [eeaccountmanager@energystar.gov](mailto:eeaccountmanager@energystar.gov).

Thank you for your support of ENERGY STAR.
