# Solid State Lighting - Get The Facts

Essential Questions to ask your SSL Luminaire Manufacturer/Representative

## TESTING

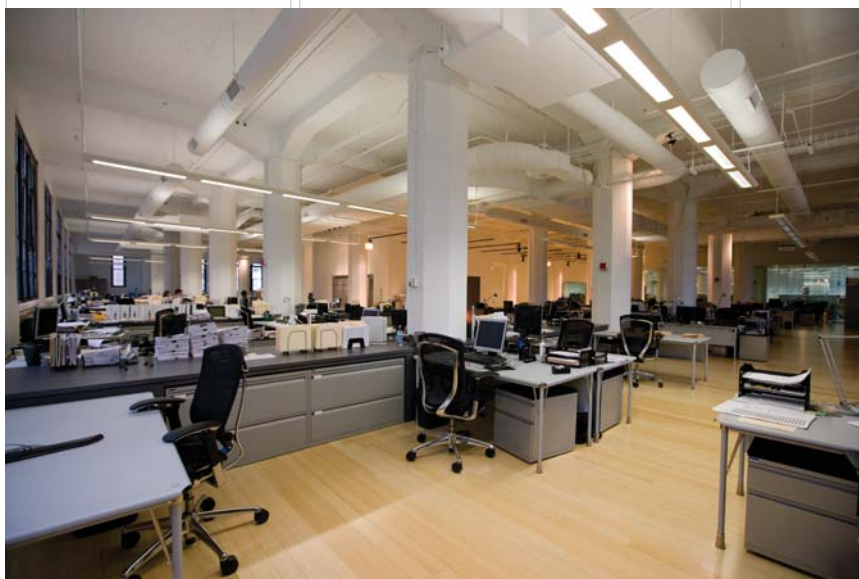

- Is there an LM-79 testing report for the luminaire?
- Has the luminaire been thoroughly heat tested?

## POLICIES

- What is the process to replace defective LEDs in their luminaire?
- Do they have a written binning policy for each LED type used in their luminaire?
- Is there a written end of life policy for their luminaire?

## WARRANTIES

- Are all parts (including luminaire, driver with enclosure, and LEDs) provided by the manufacturer and covered by their warranty?
- Does their written warranty include material and labor when replacing defective product?
- Is there a policy for replacing luminaires where colors do not match?

## About Lightswitch

Lightswitch is an industry leader in designing dynamic and exciting lighting environments for live events and architectural environments. The Lightswitch team is a design consortium with offices in Chicago, Los Angeles, New York, Orlando and San Francisco. Lightswitch provides a full range of cutting edge architectural and event lighting designs to an ever-expanding group of clients. Principals and staff members are highly trained industry professionals who understand the importance of communication and interpreting a client's needs in order to bring a project to life.

Specifically focused on architectural projects, the Lightswitch Architectural division is known for innovative and cutting edge creations while maintaining a reputation for attention to detail, professionalism, and client service. We have a proven track record of delivering designs that are exciting, dynamic and visionary – on time and on budget.

Lightswitch Architectural works with developers, architects, property owners and managers who are seeking quality lighting design for architectural projects - corporate buildings, residential properties, museums, schools, hotels.

## About the Speaker

Avraham (Avi) Mendall Mor, LEED AP, IESNA is a leading architectural and theatrical lighting designer with over ten years of experience in a variety of applications, locations, and clientele. He seamlessly ensures successful project completion; balancing the complex issues of code and environmental requirements, while managing to the client's budget and time line. Avi received his Bachelor of Fine Arts degree in Architectural and Theatrical Lighting design from the University of Kansas in Lawrence. He is president of the Chicago Section of the Illuminating Engineering Society (IES) and a member of the International Association of Lighting Designers (IALD).
