

UTAH

The simple
choice for
energy
efficiency.

Updated April 2019

Families and businesses are saving with the help of ENERGY STAR®

Utah is home to about **120** businesses and organizations participating in U.S. EPA's ENERGY STAR program:

- 5** manufacturers of ENERGY STAR certified products
- 5** companies supporting independent certification of ENERGY STAR products and homes
- 30** companies building ENERGY STAR certified homes, 2 of which are committed to building 100% ENERGY STAR, as well as many businesses, schools, governments, and faith-based groups using ENERGY STAR to reduce energy waste.

Across Utah

- 913 thousand customers** were served by ENERGY STAR utility partners in 2018
- 1,645 buildings** (more than 141 million square feet) were benchmarked in 2018 using EPA's ENERGY STAR Portfolio Manager
- 29,600 homes** have earned the ENERGY STAR
- 490 buildings** have earned the ENERGY STAR for superior efficiency, including 311 schools, 3 hotels, 4 hospitals, 77 office buildings and 4 industrial plants.

Cottonwood Corp Center, Salt Lake City, UT. ENERGY STAR Certified in 2016.

State Spotlights

"Energy Rated Homes of Utah is proud to provide rating services to certify new homes to earn the ENERGY STAR label throughout the state of Utah. The ENERGY STAR label on a home means that it has been designed and built to standards well above other homes in the market today. It means better quality, better comfort, and better durability. It also means that the home is a better value for today, and a better investment for tomorrow. The ENERGY STAR label gives homeowners the peace of mind that their home has undergone a better process for inspections, testing, and verification to ensure that it meets strict requirements set by the U.S. EPA. ENERGY STAR certified homes are better..." – Energy Rated Homes of Utah

As part of Salt Lake City's "Skyline Challenge", a voluntary program that uses EPA's ENERGY STAR Portfolio Manager to help local organizations reduce energy waste and save money, participant **LDS Hospital of Intermountain Healthcare** identified **savings of more than \$250,000 annually** after benchmarking the facility.

"When real estate owners invest in energy efficiency, it improves building performance, saves money, and improves air quality. ... CBRE prioritizes energy efficiency as a strategic way our real estate clients can get ahead. Now there is an opportunity for the market as a whole to make great progress by promoting energy efficiency in the largest buildings throughout Salt Lake City. We strongly support the efforts of Project Skyline to ... encourage energy efficiency." – David Pogue, Global Director of Corporate Responsibility, CBRE
