Design Guide

Purpose
The purpose of Lighting for Tomorrow is to increase the market availability of energy-efficient lighting fixtures. Specifically, the competition’s objectives are to increase the number of SKUs within critical product, style, and price categories;

In addition, the competition aims to increase the relative emphasis on energy-efficient lighting among consumers, builders/contractors, electricians, and distributors/showrooms.
Finalist

Pendants under $100  

Oslo
Finalist

Surface mounts over $75

Ensenada
Finalist
