Product Manager for Windows, Doors, and Skylights
ENERGY STAR® Labeled Products

Via eMail

Subject: Vitro Architectural Glass public comments on the U.S. ENERGY STAR 7.0 Draft 3 final proposed version specification for windows, doors, and skylights.

Dear Mr. Anderson,

I am writing to inform you that Vitro Architectural Glass fully supports the Version 7.0 Draft 3 final proposed version ENERGY STAR product specification for Windows, Doors, and Skylights as provided by the U.S. EPA.

Vitro supplies products that can be used by window, door, and skylight manufacturers to comply with the current draft specification. Furthermore, the current draft will promote energy efficient glazing products and save consumers money.

Thank you for the opportunity to provide input to the proposed improvements to the ENERGY STAR for Windows, Doors, and Skylights Program. Please let me know if there are any questions or if I can provide any additional information.

Best regards,
