

UPGRADE NOW AND WARM UP TO SAVINGS

DON'T GET CAUGHT OFF GUARD!

If your water heater is more than 10 years old, you could be risking leaks and flooding.

WATER HEATERS ARE THE **2ND** HIGHEST ENERGY USER IN THE HOME.

Upgrade now to a new ENERGY STAR certified water heater and you could save up to \$3,500 over its lifetime. Water heaters that have earned the ENERGY STAR are independently certified to save energy and protect the environment.

CHOOSE YOUR HOT SAVINGS WITH ENERGY STAR

An **ENERGY STAR certified electric storage water heater** uses half the energy of a standard model and can save a family of four more than \$3,500 over its lifetime by heating water with a highly efficient heat pump (an air conditioner run in reverse).

An **ENERGY STAR certified gas storage water heater** uses 8% less energy through better insulation, heat traps and more efficient burners.

An **ENERGY STAR certified tankless water heater** can save a family of four more than \$1,500 over its lifetime on gas bills compared to a standard gas storage model by heating water only when you need it.

GOOD FOR YOU. GOOD FOR THE PLANET.

If all residential water heaters sold in the U.S. were ENERGY STAR certified, the energy cost savings would grow to nearly \$13.4 billion annually, preventing more than 155 billion lbs of greenhouse gas emissions—equal to the emissions from 15 million vehicles, every year!
