ENERGY STAR®, a U.S. Environmental Protection Agency program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit www.energystar.gov.

Dear ENERGY STAR® Commercial Food Service Partner and Stakeholder:

The U.S. Environmental Protection Agency (EPA) invites you to participate in its next installment of the commercial food service (CFS) webinar series!

This webinar series occurs monthly and covers a range of topics which highlight strategies to leverage the ENERGY STAR logo, tools, and resources, ENERGY STAR partner success stories, and more! The April webinar will spotlight another EPA voluntary program, the Green Power Partnership, and opportunities to leverage both programs.

Webinar information:

Title: Spotlight on EPA's Green Power Partnership
Date and Time: Tuesday April 13; 1 PM – 2 PM EDT
Please register for the webinar [here](#).

The U.S. Environmental Protection Agency (EPA) Green Power Partnership (GPP) was established in 2001. The goal of the GPP is to protect human health and the environment by increasing organizations' voluntary green power use. The program provides technical assistance to organizations as they either start or expand their green power use. The GPP also provides public recognition and promotion for companies and other organizations that use green power. In return for technical assistance and recognition, Partners commit to using green power for all, or a portion, of their annual electricity consumption.

This webinar will:

- Celebrate this year's Earth Day theme by introducing partners and stakeholders to EPA's Green Power Partnership program and the combined benefits of energy efficiency and green power
- Demonstrate how other organizations have leveraged both ENERGY STAR and the Green Power Partnership program to meet their clean energy goals

Questions may be directed to CFS@energystar.gov.

Thank you for your support of ENERGY STAR.
