Rise to the Challenge!

We've pledged to reduce this facility's energy intensity by 10% in five years or less through the ENERGY STAR Challenge for Industry.

As a partner with the U.S. Environmental Protection Agency's ENERGY STAR® program, we're committed to protecting the environment through energy efficiency. If the energy efficiency of U.S. commercial and industrial buildings improved by 10 percent, Americans would save about $20 billion and reduce greenhouse gases equal to the emissions from about 30 million vehicles.
