5 Steps You Can Take to Save Energy

1. Change a light.

Replace light fixtures and bulbs with ENERGY STAR® qualified lights.

2. Heat and cool smartly.

A programmable thermostat and proper maintenance can save you \$180 per year.

3. Choose energy efficiency.

Buy ENERGY STAR qualified home appliances, electronics, and homes.

4. Seal the deal.

Seal air leaks with insulation, weather stripping, and caulk; buy ENERGY STAR qualified windows.

5. Put your home to the test.

Use the ENERGY STAR Home Energy Yardstick and see where you can save (www.energystar.gov/yardstick).

Improve your home's energy efficiency.

For more ideas on how you can save at home with EPA's ENERGY STAR program, visit www.energystar.gov/homeimprovement.

Shut It Off!

You don't leave your car running in the parking lot.

Why keep equipment on when not in use?

Eliminate waste and save money!

- Walk the facility during off hours to see what's left on
- Reduce lighting levels in unused areas
- Use shutdown procedures for the facility
- Turn off equipment during non-production periods

Energy management is good business.
