## Award Recipient of the ENERGY STAR Challenge for Industry

Garysburg, NC Facility 8060 NC 46 HWY Garysburg, NC 27831

The Garysburg facility has the capacity to process approximately 60 million inshell pounds of farmer stock peanuts annually. For fiscal 2010, the Garysburg facility processed approximately 18 million pounds of inshell peanuts. Other functions occurring at the Garysburg facility include; purchasing, processing, packaging, warehousing and distribution.

The Garysburg facility achieved the ENERGY STAR Challenge for Industry in 2009. This plant reached 23% reduction in energy intensity within one year of its baseline. The Garysburg Plant achieved the Challenge through projects such as lighting upgrades and identifying and reducing compressed air leaks. Overall, the Garysburg facility has reduced energy intensity by 670 kBTU per ton of nuts and snacks processed. This has resulted in a savings of 14,203 mmBtu in 2009.

John B. Sanfilippo & Son, Inc. (JBSS) maintains a comprehensive energy management program. Under this program, JBSS has progressively applied proven energy management practices promoted by ENERGY STAR including goal setting, project implementation and evaluating progress.
