

**Hello ,Dear Taylor ,**

I am glad to have this chance to comment Luminaire Version 1.1 revise for Version 1.2;

I think the requirement "Product Labeling & Packaging Requirements", need clarification which language may indicated on label alternatively .

For example, "Type IC" is required by UL 1598 Marking requirement,if Energystar's criteria require such language:"IC-rated for direct contact with insulation" on package,this may be duplicate requirement.

**Thanks and best regards!**

Peter Tao
