

ENERGY STAR Eligibility Criteria Final Draft Version2.0 Opinion Brief

1. Comments

(1) DFE Requirements (Line 448-449)

In Line 448-449, “the ready mode power of the DFE, measured in the test method, should be divided by 0.60 to account for internal power supply losses” , this “the ready mode power of the DFE” is unclear.

We recommend change the word.

the ready mode power of the DFE -> the each mode of the DFE

(2) DFE Requirements

The measurement method of Standby mode of the DFE is unclear.

Please add the concrete method of measurement or example.

(3) Writing error

There are some numbering errors.

Line 470 3.4.2 -> 3.4.3

Line 493 3.4.3 -> 3.4.4

Line 540 3.4.4 -> 3.4.5

END
