Washington, DC 20460

July 23, 2013

Ms. Jantz-Sell,

NEEP appreciates the opportunity to once again provide comments to the ENERGY STAR program as it works to develop a technology neutral specification for replacement lamps. NEEP appreciates ENERGY STAR's clarifications in response to NEEP's previous comments to Draft 3 and Draft 4 of Version 1.0. After review of the Final Draft, NEEP would like to express our support for the Final Draft of the ENERGY STAR Lamps V1.0 specification. We feel that through this process ENERGY STAR has developed a strong specification that will ultimately ensure that only high quality energy efficient lamps are ENERGY STAR certified. This will ensure that efficiency programs in the Northeast and Mid-Atlantic States are able to capture energy savings through promotion of ENERGY STAR products. Ultimately, this is a great step forward to address the rapidly changing lighting market.

Thank you again for conducting a productive process. Please contact me with follow up questions or clarifications.

Sincerely,

A handwritten signature in black ink, appearing to read 'Claire Miziolek', written in a cursive style.
