SNIA Japan Forum
2009 SNIA Japan Forum Board

- EMC Japan K.K.
- Tokyo Electron Device Limited
- Toshiba Solutions Corporation
- IBM Japan, Ltd.
- NEC corporation
- Hewlett-Packard, Japan
- Hitachi, Ltd
- FUJITSU LIMITED
SNIA Japan Forum
Strategic Plan

- Technology leadership for market and end users as the representative from SNIA.

- To lead of technology progress in Japan vendor and market. SNIA-J will join TWG to build new technology (ex. Green, SSD)

- Collaboration with other associations. (JEITA, JDSF, GIP Council, IDC-Japan, TGG-Japan)

- Provide updated SNIA information to members continuously.
The Ministry of Economy, Trade and Industry of Japan (METI) has continuously lead the Japan IT industry by the “energy conservation low “

JEITA (Japan Electric Industry Technical Association) has drove to vendors as a related organization under METI

METI developed ‘top runner’ scheme, which at a time judges a most energy-efficiency product (it’s called as ‘top runner’) and other venders will be encouraged to improve their product(s) than ‘top runner’ in future.

METI has strong interest in EPA/SNIA scheme to develop next ENERGY STAR specification.

SNIA-J will keep contacts to related organizations.
Top runners in HDD based Storage Products (JEITA, 2007)

RPM Assort in each vendor

Ratio of W/GB

2007年度基準の全製品データ分布図（2007年度出荷製品データ）
Thank you!
