

**Email received on January 3, 2011 from Jian Yao.**

Dear Sir/Madam,

SSL 1.1 product categories include commercial type luminaires, such as wall wash, bollards. SSL 1.1 has detailed distribution requirements for them. But I found in the final version of Luminaire, they are not included in directional commercial luminaires.

My question is after Oct 1, 2011, those certificated products will be delisted by EPA?

Best regards,

Jian Yao from Underwriters Laboratory
