

Hello,

I am sorry to submit you the opinion too late.

\* the opinion

#### 1. LG's Proposal

The minimum Energy Factor(increased by 0.1, 0.2, 0.3, and 0.3 L/kWh) of dehumidifier should be applied to the products which manufactured on or after March, 2007 .

#### 2. Rationale

We do not have enough time to prepare against this draft.

We are developing 2006 models in our R&D. The 20% of those models can only be met the MEF increased of draft 2.0.

It will cost a great deal to change our R&D system of 2006 models.

Thank you.

Best regards
