

Email received on June 21, 2010 from Edi Chang.

Dear Sir.

Thank you for my comments will be posted on the ENERGY STAR Web site.

Please don't be missed a part such as following:

Also same Note language shall have written on QPI form for online submit.

In past three years was big problem on case of GU24 integral CFL. Was had high number manufacturers online submit as partners with use GU24 platform file. Once got EPA issued joined program on list as partner than never back perches GU24 CFL with origins platform's owner. They bought low price 60 cents no quality GU24 lamp which just had that citified by UL put-into shipment and no one known that in U.S.A.

If EPA does not stop this leak for program the 99% disqualified CFL, LED and SSL lamps will be easy into entry market breakdown all of enhancement rules. Government Agency may order to recalled back all that disqualified product which partner have cheated to program.

Best Regards
