

Email received on January 13, 2011 from Mike O'Regan.

Dear Sir/Madam,

Nualight's concerns with this new draft attached are as follows:

1. Can LED lights for retail refrigerators, deli counters and chillers fit under one of the current categories?
2. Can LED lights for retail bread racks, indoor canopy and other ambient temperature shelf lighting applications fit under one of the current categories?
3. Why is "Refrigerated Case Lighting" not mentioned as it is in DLC requirements?
4. What is the agenda for including a category that matches Nualight applications?

Nualight provides Low Voltage LED lighting products for General Retail Display.
