### **Comment on the ENERGY STAR® Telephony “Version 3 Test Data Template”**

We recommend that the text in Row 63, Column C of the “General” worksheet in the Test Data Template be changed from “Network Speed PoE Mode” to “PoE Mode”. The network speed and the PoE mode are not related parameters.

(Sifos’ draft 1 comments mentioned this, and the change was subsequently made to the Test Method, however the change didn’t carry over to Test Data Template.)
