

Dear Mr. Ryan:

We reviewed with great interest the Revised Final Draft ENERGY STAR Version 2.0 Specification for Roof Products. We were very pleased to note the thoughtful changes made by EPA concerning a national emissivity requirement.

The provisions in the Revised Final Draft Specification will assuredly advance the collective knowledge of cool roofing properties while also appropriately recognizing the benefits of regional flexibility and education in their application.

Our membership is duly advised to report the initial emissivity results for newly submitted and already qualified products, per the Version 2.0 Specification, as of October 31, 2007.

Please let us know if you need any additional information.

Sincerely,

Gregory L. Crawford
Executive Director
Cool Metal Roofing Coalition
