Re: ENERGY STAR Program Requirements Room Air Conditioners Product Specification, Eligibility Criteria, Draft 2, Version 3.0

On behalf of General Electric, Appliances & Lighting (GE), I am pleased to submit the following comments concerning the ENERGY STAR proposed revisions to the Room Air Conditioners eligibility criteria. GE has had a long commitment to energy efficiency, including the manufacture of energy efficient appliances, as evidenced by the receipt last year of ENERGY STAR's Sustained Excellence award for the fifth straight year. As such we have a strong commitment to the value of the ENERGY STAR brand, and offer these comments to you in a spirit of partnership.

GE would like to adopt by reference the comments that we understand will be submitted by the Association of Home Appliance Manufacturer's (AHAM). We would like to note in addition, however, that we are reserving comment with the Smart criteria proposed in the specification. We will follow-up with additional comments on these criteria at a later date.

Please do not hesitate to contact me with any questions.

Sincerely,

A handwritten signature in black ink that reads "Kelley Kline".
